SPECIAL ACCESS REQUIRED

PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 9034 SESSION NUMBER: 01
DATE OF SESSION: 12 JUN 90 DATE OF REPORT: 13 JUN 90
START: 1339 END: 1500
METHODOLOGY: CRV VIEWER IDENTIFIER: 095

SG1B

1. (S/STD) MISSIONS: Determine the disposition and location of the contraband in the form of drugs transported off the coast of California by the 85-foot coastal freighter identified as the

2. (S/STD) VIEWER TASKING: Access and describe the target at Encrypted Coordinates 542874/435900.

3. (S/STD) COMMENTS: No inclemencies noted. A Summary of Information is attached to this report. Once target was acquired, 095 cued to determine if illegal drugs were on board on 1 May 90. A second session will be conducted to determine the presence of drugs subsequent to the 1 May 90 time frame.

4. (S/STD) EVALUATION:

5. (S/STD) SEARCH EVALUATION:

HANDLE VIA SKEET CHANNELS ONLY

SUMMARY OF INFORMATION

The site is a blocky, multi-level, wide, chunky, primarily metallic vessel. When viewed from the side it has a complex profile consisting of rectangles (cubicle objects and structural components) of different height and width. The vessel is reminiscent of a cargo barge or container ship. Colors associated with the site and its environs are white, blue, dull metallic silver, black, brown and dull red.

There is an narrow area on the vessel that extends a long distance that has high vertical sides. The shape was reminiscent of a man-made canyon.

Associated with the structure is a short, but stocky and imposing man with dark, straight (or poorly cut) hair. This man is powerful (not sure if physical power or status power). <My instinctive reaction to him was of fear.>

On 1 May 1990, the structure appeared to have a flatter/smoothen profile and was buoyant/high in the water. Outside on deck it was smelly and noisy. The 'man-made canyon shaped area' was not present: that area was level.

~~SECRET STIPPLED HANDBOOK~~

~~SECRET STIPPLED NOFORN~~

The cue <something of interest on board May 1, 1990> resulted in a movement to a position low in the ship (against the bottom.) The area was hot and flat and smelled oily and salty. A constant thrumming/vibration was present. There were large circular bumps reminiscent of large, smooth, metal rivets.

When asked to probe notional sketches of the vessel for something of interest on board 1 May 1990: a region below the water line at the bottom of the vessel, slightly to starboard of midships. When moving to that position, nothing solid was perceivable. Associated with this area was the concept of a double layer of metal over a odd-shaped space (nothing perceived inside: for shape see sketch p. 15).
